Venice Summer School in Digital and Public Humanities

Venice, 8-12 July 2024

The Venice Summer School in Digital and Public Humanities provides advanced and in-depth training in theories, technologies and methods applied to historical monuments, artefacts and texts. Focussing on cultural, archaeological, historical, literary, and artistic materials from Venetian sites and cultural heritage institutions, participants will engage in debates about digital cultural heritage and public humanities while enhancing their competences and skills in digitising materials and sources and in modelling, analysing and visualising multimedia humanities data.

The summer school takes place at historical sites and cultural venues across the city of Venice and its surroundings. Each day is dedicated to a specific academic field: archaeology, history, art history and textual scholarship. Teaching formats include lectures, hands-on workshops, guided tours and experimental performances. Lessons are planned and delivered by local experts and invited specialists. All classes will be taught in English. The programme includes “Meet the Expert” sessions for discussing the participants’ individual research projects with domain experts.

Gazing Upon Venice: an Eye-Tracking Experiment

In the field of digital and public archaeology the interplay between digital tools and methodologies for research and public engagement can enhance the way knowledge is produced, shared and used. This neurohumanities experiment can reveal insights

into participants' visual preferences, providing valuable information for urban design or visual content presentation.

Outdoor activity: data acquisition. During this phase, the eye-tracking device records the subject's eye movements while observing the panorama, capturing details on visual focus and the duration of observation on specific points of interest.

Location: Ca' Foscari Cultural Flow Zone - CFZ (Fondamenta Zattere 1392) in presence and online

- 14:30-17:00 Data processing and analysis in the laboratory. Gaze patterns are examined to identify areas of higher interest or attraction in the panorama. The data processing session contributes to a deep understanding of the visual perception of Venice from a unique vantage point.

Area 3: Digital and Public History

Walking in the Past. Exploring History through Screens and Mobile Phones

The day will revolve around two different but connected topics: the presentation of history to the public in museums and exhibitions, and the presence of history in public spaces. In both cases the digital and public methodologies will be strictly connected. In the morning we will take a tour of a very recent and innovative museum of Italian contemporary history and in the afternoon we will put to the test a brand new locative app which aims at discovering early modern Venice, created under the aegis of VeDPH. Two innovative ways of exploring Italian history through the lenses of the new technologies and by means of hands-on activities, immersion, and interaction.

=== DAY FOUR===

Thursday 11 July, 9:00-18:30

Area 4: Digital and Public Art History

A museum with a view. A framework to enrich and describe images

The purpose of this activity is the description, following IIIF standards, of both the environment and the works of art of one of the most important collections of contemporary art history in Venice, the Peggy Guggenheim Collection. Participants are requested to take panoramic pictures (where allowed) of the museum, focusing on the specificity of the place and including the artefacts collected in each room. Starting from the artworks in the museum, the students will compose the string for an image API and a Manifest within the IIIF framework.

The goals of the day are to investigate the modality of acquisition and reuse of images in their environment; to learn how to enrich image metadata with descriptions also relevant to the place where they have been taken; to become acquainted with the policies of circulating and creative reuse of images in different contexts. To this end, the visit to the Biennale Art Exhibition will also be linked to this strand, to stimulate the students to observe and acquire images and to discuss the impact of the digital image in new media culture during the Experiential workshop.

Location: Peggy Guggenheim Museum, Venice

- 9:00-9:15 Stefania De Vincentis, Paolo Berti (Ca' Foscari): Introduction
- 9:15-10:30 Ambra D'Antone (Assistant Curator of the museum's collection): Guided tour + visit of the temporary exhibition *Jean Cocteau. La rivincita del giocoliere*.
